# Ink Filling Instruction for Canon Cartridge

1. Checking

Remove the bottom protective cover;

Check whether there is sponge;

Please make sure that the sponge is
flat in position and not over the edge.

Fasten the cover back onto the cartridges
Please make sure it is sealed very well.

2. Filling

Use the 60ml syringe to draw 20ml ink,
then insert it into the refilling hole;

Make sure that the syringe fit the hole
very well. Otherwise, Ink could not flow
into the cartridge fluently.

Pull up the plunger for about 15ml to Vacuum the cartridge;

Then loose the plunger, the air pressure will push Ink go into the cartridge naturally.

Note: Please kindly note that not to press the plunger down, or it will cause the ink to splash out immediately..

3. Finish

If you couldn't fill the cartridge to full status in one time, please repeat these steps for about two or three times..
